A CLOSE ENCOUNTER of the 2nd kind

Two weeks ago, my friends Peter, Sylvie and I went camping at Lake Erie near Pennsylvania. It was a windy fall night; Sylvie and I were preparing some snacks in a tent while Peter was playing music in his car, when suddenly we heard a very loud noise, it was strange because the music was distorted and I thought that something wrong was with Peter, so Sylvie and I went out to see what had happened to him. Surprisingly, Peter was standing still outside the car when a beautiful blue light became visible some meters away behind the bushes. The light seemed too bright to belong to another car, for that reason we decided to investigate.

When we got closer, we quickly realized that we were witnessing something out of the ordinary since it was a rounded object and it appeared to have a dome on top. Sylvie was taking some pictures with her cell phone when the object changed to green and red. While it was moving very fast, it disappeared unexpectedly.

After a while we went back to the tent, we were really surprised by what we had seen, we talked to some people but they didn't believe us.
